

npm

```
// NODE_HOME      E:\work\nodejs
// PATH           ;%NODE_HOME%;%NODE_HOME%\node_global;
//node_global npm
npm config set prefix "E:\work\nodejs\node_global"
//node_cache npm
npm config set cache "E:\work\nodejs\node_cache"
```

npm

```
// registry
npm install --registry=http://registry.npmmirror.com
// 
npm install --registry=http://registry.npmmirror.com
// express
npm install express --registry=http://registry.npmmirror.com
// cnpm
npm install -g cnpm --registry=http://registry.npmmirror.com
// cnpm
cnpm -v
// cnpm express
cnpm install express
// npm cnpm
npm config set registry http://registry.npmmirror.com
// npm
npm config set registry https://registry.npmjs.org
// npm
npm config get registry
```

vue-cli

```
// 安装 Vue  
npm install -g @vue/cli  
// 切换到工作空间  
cd /Users/work/VueWorkspace  
// 创建项目  
vue create vuedemo1
```

vite

```
安装 vite  
npm init vite  
选择 vue3  
配置 =  
构建 ts-javascript  
完成  
// 切换到项目目录  
npm install cnpm i  
启动  
npm run dev
```

vite.config.js

```
export default defineConfig({  
  server:{  
    // 监听端口  
    open:true,  
    // 监听端口  
    port:8088  
  },  
  plugins: [vue()],  
})
```

router

```
//\u65b0\u5316  
npm add vue-router -D  
//\u65b0\u5316  
npm add vue-router -S
```

src\router\index.js

```
//\u65b0\u5316  
import { createRouter, createWebHashHistory } from "vue-router";  
//\u65b0\u5316  
const routes=[  
//\u65b0\u5316  
{  
  path: '/',  
  redirect: '/index'  
},  
{  
  path: '/index',  
  name: 'index',  
  component: () => import('../views/index/index.vue')  
}  
]  
//\u53d6 router\u53f7  
const router = createRouter({  
  history: createWebHashHistory(),  
  routes  
})  
//\u53d6  
export default router
```

main.js\index.js

```
//\u53d6  
import router from './router/index.js'  
//\u53d6  
createApp(App).use(router).mount('#app')
```

vite.config.js

@

```
// @viteConfig
import path from 'path'
// https://vitejs.dev/config/
export default defineConfig({
  server: {
    // ...
    open: true,
    // ...
    port: 8088
  },
  resolve: {
    alias: {
      '@': path.resolve(__dirname, 'src'),
    }
  },
  plugins: [vue()],
})
```
